

ACCELERATE BUSINESS WORKFLOWS WITH

CUSTOM INTELLIGENT DOCUMENT PROCESSING (IDP)

WHAT IS IDP?

IDP is an umbrella term for software that extracts, organizes, and analyzes information from enterprise documents like reports, contracts, and emails. It goes beyond simple extraction by enabling workflows that automate recurring tasks.

Recent breakthroughs in LLMs have opened up exciting new possibilities for processing and analyzing complex documents at unprecedented accuracy, speed, and scale.

HOW DEEPSET IDP WORKS

- Automates document-intensive analysis of incoming datasets with AI-infused workflows.
- Ingests and unifies information like scanned documents, digital files, web data, structured account information, and complex formats like tables, graphs, audio, video, and images (multimodal IDP).
- Uses LLMs to find information in databases and convert it into the format you need, such as filling in a spreadsheet, memo, or report template.
- Applies annotations to AI-generated content to help humans review for accuracy.

REAL-WORLD IMPACT WITH DEEPSET

credX

Commercial Real Estate Financing: credX, a German B2B lending platform, automated the review of 1,000-page loan documents per transaction with a deepset IDP solution, enabling repeatable, accurate financing decisions and new service offerings.

DEEPSET: DELIVER CUSTOM, MISSION-CRITICAL IDP

WORKING WITH DEEPSET

AI Expertise

Work with deepset's technical experts and AI engineers to deliver IDP tailored to your business outcomes.

Future Proof AI

Choose and switch between any commercial or open-source LLMs without vendor lock-in.

Trusted Technology

Maintain high accuracy while increasing processing volume for any document type.

Fast Time to Value

Accelerate development with deepset's modular approach to building tailored solutions teams trust.

“What sets deepset apart is their technical expertise and collaborative approach to building AI applications and agents. They demonstrated exceptional ability to understand our credit analysis needs and rapidly deliver customised AI solutions for complex customer documents.”

—Nathan Holmes, Product Director
