

Customize Gen AI to
Work the Way You Do

Build mission-critical AI agents and apps tailored to your business goals—where accuracy, speed, and adoption matter most

Grow revenue

25% increase in user engagement & **5X ROI on AI**

“Our work with deepset has positioned us as a leader in our space. We’ve exceeded benchmarks, improving our client relationships as they see us responding to their needs and driving growth across our business.”

Dan Coates, President

Rapid Deployment

4 weeks time to value

“What sets deepset apart is their technical expertise and collaborative approach to building AI applications and agents. They rapidly deliver a customized AI solution, transforming our credit analysis workflows and delivering real business value.”

Nathan Holmes, Product Director

Empower Users

< 1 second response time for accurate answers

“By leveraging deepset’s expertise in agentic RAG systems, the risk of producing inaccurate or misleading information is significantly reduced.”

Daniel Kalfass, Senior Expert for 3D Simulation of System

Optimize Workflows

40% increase in productivity

“We’re not only achieving our goals for time savings and quality improvement, but the system’s capabilities are revealing new business opportunities we hadn’t envisioned at the start.”

Ralf Kauther, CEO

An Outcome Based Approach for Every Customer

**Business Outcomes
are the northstar.**

Productivity, Efficiency
Growth, Accuracy

**Services drive your
success.**

Advisory, Implementation,
Optimization, Onboarding,
Training

The Platform delivers time-to-value.

AI Orchestration: Build, Test, Deploy, Monitor

Customize and Combine Top AI Architectures for Your Use Cases

Retrieval Augmented Generation (RAG)

Retrieve relevant documents, use them to inform responses, and generate accurate and contextually rich answers to complex queries.

AI Agents

Automate and streamline tasks, workflows, and insight generation with a compound AI system capable of complex reasoning and decision-making.

Enterprise Search

Understand and retrieve information based on semantic similarity to deliver highly accurate search results and advanced recommendation services.

Text-to-SQL

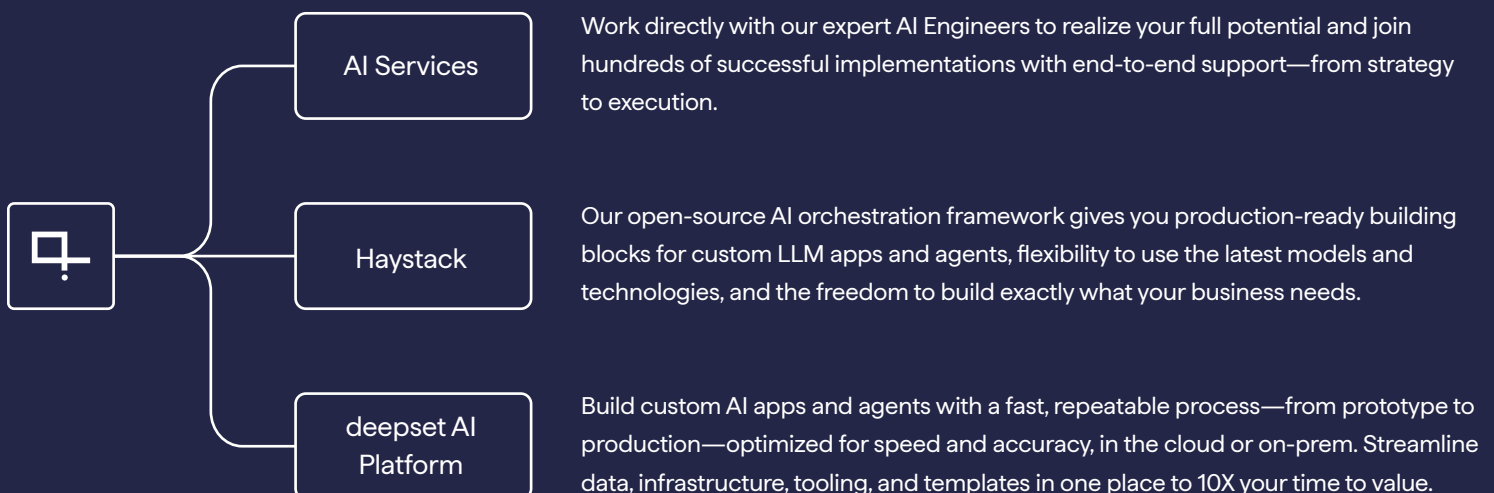

Transform natural language queries into SQL commands, ask questions of complex datasets, and make data analysis more accessible and intuitive.

Intelligent Document Processing (IDP)

Process documents at scale, accelerate insight extraction, and boost workflow efficiency with AI-powered automation.

deepset: Accelerate the Development of Production-Grade AI Apps

deepset empowers you to tailor AI to your business, building high-value, mission-critical applications and agents that drive adoption and ROI. We focus on your outcomes, accelerate execution with expert services, and streamline the AI lifecycle into a fast, repeatable process—all built on Haystack, the trusted foundation for enterprise AI orchestration
